

NHS & Blue Light

PUBLIC USE - V1.0

Fact Sheet

Brief Summary

NHS and Blue Light organisations must deliver at pace while maintaining compliance, evidencing value, and managing increasing complexity with limited capacity. Bloom's fully compliant NEPRO Three framework provides a trusted, NHS-approved route to market, enabling you to move from approval to award in weeks, not months. Reduce risk, stay audit-ready, and deliver measurable value with confidence.

Delivery & Efficiency

With extensive experience delivering projects across the NHS and Blue Light sector, we understand the need to move quickly without increasing risk, particularly under year-end pressures. With over **55% of clients returning for repeat business**, our model consistently delivers reliable, efficient results that organisations trust to use again and again.

Resource Capability

Where internal capacity is constrained, Bloom offers scalable expert support, helping NHS and Blue Light organisations manage high volumes, specialist requirements and transformation projects without increasing headcount. With access to over 290 specialist suppliers across areas including organisational change, asset management, finance, and health, you retain full flexibility while ensuring the right expertise is in place to deliver.

Compliance

Compliance is critical with every project. Bloom provides a fully managed framework aligned with PCR 2015, ensuring every procurement is transparent, auditable, and governance-ready. With built-in controls, clear audit trails, and expert oversight at every stage, NHS and Blue Light organisations can procure with confidence while reducing risk and maintaining full regulatory compliance.
